

ScorpionTrack – Stolen Vehicle Solutions

ScorpionTrack actively protects your vehicle against illegal movement using GPS technology along with movement detection sensors hidden within the vehicle. Upon illegal movement detection ScorpionTrack will discretely notify our international control centre of a possible theft.

ScorpionTrack is able to provide, speed, direction, ignition state, battery condition and location details to the Police control room in the event of a theft. Subject to environmental variables, ScorpionTrack is accurate to within 10 metres.

This information is gained using the very latest in UK designed and manufactured electronics along with the already proven GPS and GSM technologies.

All of this along with Thatcham approval to the highest standard ensures the best accuracy currently available through such technology.

ScorpionTrack and ScorpionTrack 5 have been subjected to the rigorous Thatcham test requirements to meet their TQA level in vehicle tracking system approval. This will cater for any insurance company TQA tracking system requirement.

Upon recovery, the ScorpionTrack operator can arrange for the return of the vehicle to the customers desired location.*

*Scorpion Automotive are not liable for any costs incurred for recovery

Thatcham Category 5 Insurance Approval

The Scorpion Track 5 is a sophisticated GPS tracking system that has been awarded the Thatcham Category 5 accreditation. Our partnership with a secure monitoring centre provides our customers with the peace of mind that comes from knowing that their vehicle security is in the very best hands.

Enhanced product features for your peace of mind

Key theft is a growing problem in the UK and across Europe and our Scorpion Track 5 product is there when your vehicle is most vulnerable. The system is an advanced GPS tracking unit enhanced with the facility to remotely prevent the vehicle from being driven but, more importantly, alert our Secure Operating Centre in the event that the vehicle is taken following a key theft.

The unit is complemented by two piano-black driver recognition cards. These are discreet and rechargeable and should the vehicle be moved without one of these cards being present, the ScorpionTrack 5 unit

will send an alert to our secure operating centre who, in turn, will contact you to confirm whether or not a theft has taken place.

ScorpionTrack and ScorpionTrack 5 also have web location on demand via your PC, table or smart phone. There's no need to download a specific App - the ScorpionTrack personal log-in has been optimised for browsing via a mobile device. Know where your vehicle is at anytime from anywhere in the world.

Why You Need ScorpionTrack?
